PERSONAL PROJECTS

BugSquash

- The motive of this website was to provide the free food to the needy with the help of NGO's all over the country. The website was made with the help of HTML, CSS and Javascript.

Digital Next Marketing

- I have made this website as a freelance work for a small company. My work was to code pages for application and about the company. This website required HTML, CSS, Javascript and python.

PLACO- A Covid Help Center Website

- We created a website with the help of HTML, CSS, and Javascript, this website help covid patients get plasma from donors and those who want to donate plasma. We named our website PLACO and it contain latest news on covid, govt helpline number, info regarding covid symptoms and preventions. One have to fill a form if he/she wants to donate/need plasma , but currently website is in building stage.

Entrepreneurship Website

- We created a website with the help of HTML, CSS, Javascript, and ReactJS to help increase entrepreneurship in country which would lead to increasing startups in future. Our website included creating a community of entrepreneurs and help them get knowledge in order to create startups. We have chats section, Blogs , video lectures, Post, Account, Marketing like features in our website.

ACHIEVEMENTS

4 star coder at Hackerrank (2021 - Present)

Hackerrank is a online competitive programming platform.
